

Infinite Spell Game

The screenplay from the storyboard: 10 scenes in play order, about 52 s.

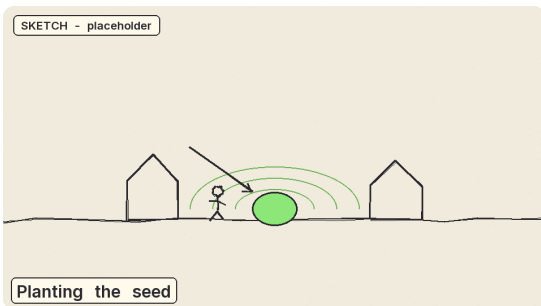

1 A TOWN AT NIGHT

The world > Pixel world · **in progress** · world/pixel/night-town.toml · ~5 s

One continuous move. Start low and cinematic, looking up at the night sky: the purple moon and the orange moon big in the skybox. Pan down without a cut to the game's own camera, the high isometric view over the cosy pixel town, snow on the roofs and lamps lit. Then the character starts walking through the town.

NARRATOR

A small town at night, under two moons:
one purple, one orange.

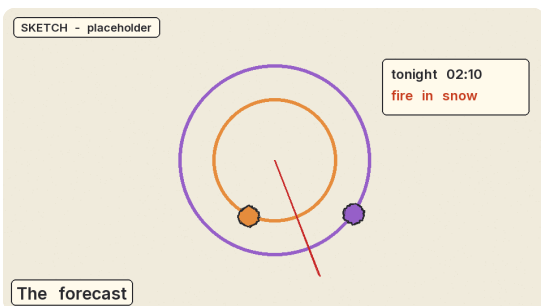

2 PLANTING THE SEED

Town seed · not started · town/seed-planted.toml · ~5 s

The player presses a glowing seed into open ground; the first houses grow up around it.

NARRATOR

Every town starts as a seed you plant,
anywhere in the world.

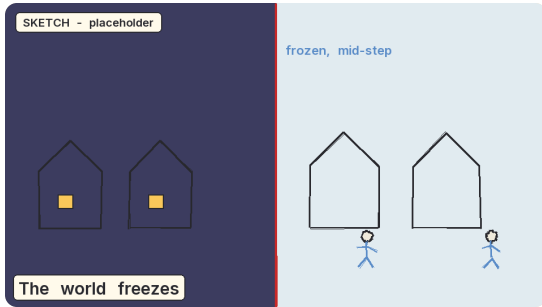

3 THE FORECAST

Weather & moons · not started · sky/forecast.toml · ~6 s

Two rings, one per moon, turning at different speeds; the next overlap marked: tonight, fire in snow.

NARRATOR

The moons run on different clocks, so
you can see when they will line up.

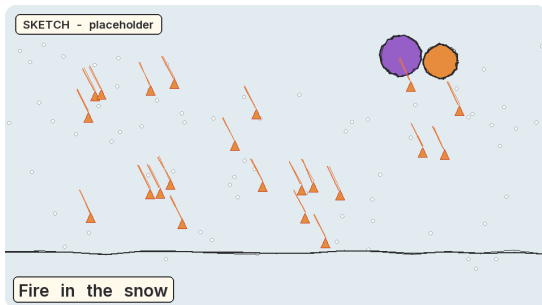

4 THE WORLD FREEZES

The world > Cel world · **in progress** · world/cel/frozen-ink.toml · ~4.5 s

Hard cut from warm pixels to flat cel-shaded ink; people stopped mid-step, lamps gone cold.

NARRATOR

When they line up, the world changes
and the townsfolk freeze.

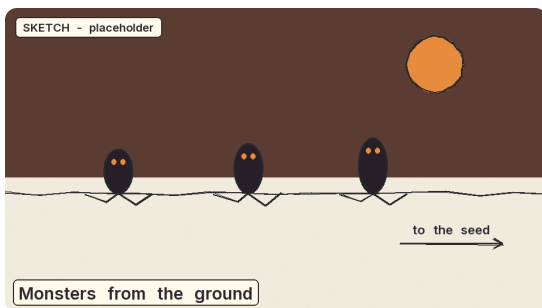

5 FIRE IN THE SNOW

Weather & moons · not started · sky/fire-in-snow.toml · ~4 s

A snowfield in the ink world; burning flakes come down and hiss into steam where they land.

NARRATOR

Purple and orange together: fire falls
into the snow.

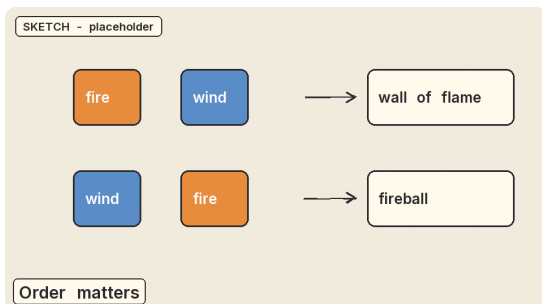

6 MONSTERS FROM THE GROUND

Weather & moons · not started · sky/monsters-rise.toml · ~5 s

Orange-lit ground cracks open; ink creatures pull themselves up and turn toward the seed.

NARRATOR

The colour of the moon decides what
climbs out of the ground.

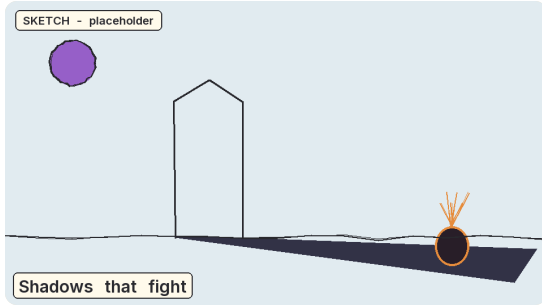

7 ORDER MATTERS

Spells · not started · spells/cast-order.toml · ~6 s

Two spell icons cast in order fuse into one; the same pair reversed fuses into a different spell.

NARRATOR

Fire then wind makes a wall of flame.
Wind then fire makes a fireball.

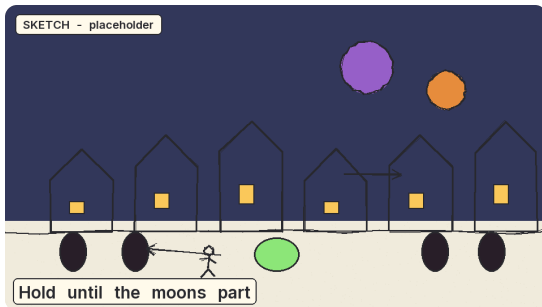

8 SHADOWS THAT FIGHT

Town seed · not started · town/shadow-defence.toml · ~4.5 s

Moonlight behind a tower; its long shadow lies across the frozen side and burns a creature that steps in.

NARRATOR

Buildings throw shadows onto the dark side, and the shadows defend.

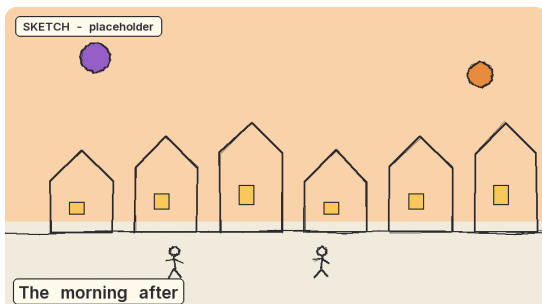

9 HOLD UNTIL THE MOONS PART

Town seed · not started · town/hold-the-seed.toml · ~6 s

The seed glowing under attack; spells, shadows and walls holding the creatures back; the moons sliding apart.

NARRATOR

If the seed breaks, the town is gone.
Hold it until the moons part.

10 THE MORNING AFTER

The world > Pixel world · not started · world/pixel/morning-after.toml · ~5.5 s

Back to warm pixels at dawn; townsfolk move again; the rings show the next overlap.

NARRATOR

The moons drift apart, the town wakes, and the next forecast comes in.
